

The Persyst Training Online Workshops!

With the expense and security hassles of getting on a plane and flying somewhere for training, we can understand why people might want an alternative to travel (even if it is to our little high-desert paradise here in Prescott, Arizona). The solution? Persyst Training Online Workshops.

These Web-based workshops use a mix of live teleconferencing and hands-on application sharing to provide a rich, interactive learning experience for you.

They're live, comprehensive and provided over the Web with flexible scheduling options to meet your needs.

... and the Persyst Training Online Workshops are ***included with your Persyst Software Support Plan*** !

The following workshops are currently available. Times are approximate and vary based on

the number of attendees. Custom workshops and collaborative meetings are available, too. Contact Persyst for scheduling and additional information.

Hands-On Workshop: Insight II EEG Review (1 Hr.)

- Set up the Persyst Multi-EEG Format Database to open EEG recordings from anywhere on your network
- Create custom montages and average references
- Set up your favorite review preferences, page color and more
- Perform basic measurements from the EEG page using the QuickStats tool
- Use the Tabbed Comment List as part of a concise and efficient review workflow

Hands-On Workshop: Persyst Ambulatory Pack (1.5 Hrs.)

- Ambulatory EEG workflow
- Seizure detection and review with Reveal Rosetta
- Rapid review of inter-ictal events with SpikeReview

Hands-On Workshop: Comprehensive Monitoring Pack: EMU, ICU and More (2 Hrs.)

- EMU and ICU workflow
- Detection and review of clinically-important events in the EMU
- EEG in the ICU: Detection of seizures, EEG changes associated with ischemic events, and monitoring of (and for) suppression-burst patterns

Hands-On Workshop: Persyst Advanced EEG Pack

These ad-hoc workshops allow you to share your specific EEG monitoring, detection and analysis needs with us, and we will demonstrate for you the most efficient way to move forward with the Persyst EEG Suite. From clinical use to novel research applications, our computational EEG experts are here to help.
